HEART SAFE COMMUNITIES UK

CPR / Use of Defibrillator Training

Cumulative Summary of Event Evaluation Forms -
Saturday 15th May 2021 - 9th July 2022

" Vital as training is, it is only of true value if those trained feel confident to use the skills learned, respond quickly and have potentially life saving defibrillators within close proximity. In those circumstances, they really do have the potential to save lives"

CPR / Use of Defibrillator Training

Cumulative Summary of Event Evaluation Forms - Saturday 15th May 2021 - 9th July 2022

This report provides a detailed cumulative summary of training events between 15th May 2021 and 9th July 2022. It covers the period leading up to the formation of Heart Safe Communities UK charity (HSCUK) and into its first year. Sessions between August and March 2023 were cancelled as a result of events described in HSCUK inaugural annual report 22nd November 2021 to April 2023.

The information summarised is taken directly from 'Event evaluation response forms' completed by participants immediately following their training session. All comments appearing on forms are included verbatim against individual sessions.

Such feedback is invaluable and enables us to reflect and develop training sessions to best meet needs. We are extremely grateful to all those who have taken their time to learn a vital life skill for the benefit of others.

It is clear to see the benefits of training from this feedback, the results of which underline the quality of what we are doing, provide encouragement and reinforce the importance of high quality training.

I would also like to offer sincere thanks and appreciation to all those who have assisted in the provision of such high quality training including Oundle Community First Responders (OCFR) Group led by Paul Brackley who assisted in the lead up to the formation of HSCUK; and whom continue to support us including with the loan of training equipment. Special thanks goes to HSCUK volunteers Jose Cordero and Adam Gilbert who continue to give their time freely to help increase the number of potential life savers in our communities.

When every second counts ……..

It pays to know what to do.

“ CPR is a skill that everyone should learn from the earliest possible age. Whilst not everyone may be able to practice that skill for whatever reason there are other ways in which anyone can help in an emergency including calling 999, calling for help, fetching / using a defibrillator, looking out for the emergency services, helping ensure the victims dignity wherever possible, looking after family or friends. The key fact is that everyone should know what to do and that they must act without delay”
